Third-Party AI Risk Screening Report

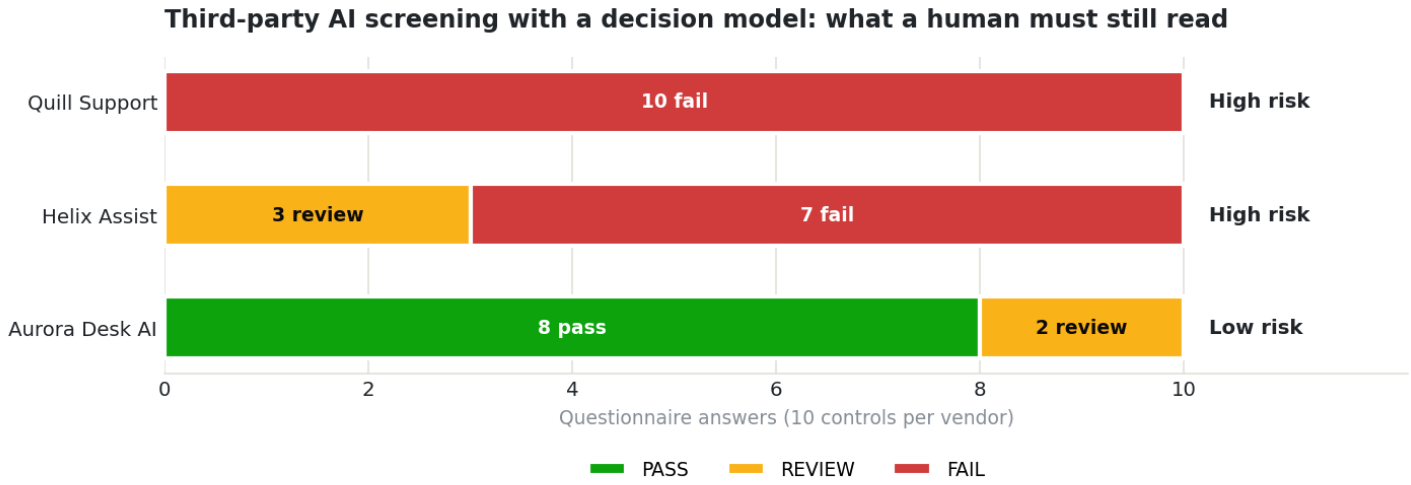

Decision-model screening of vendor questionnaire answers · synthetic vendors

1. Identification

Generated	2026-11-01 16:13 UTC
Decision model	jev-1.13.0 (TypeSafe AI, pinned version)
Decision policy	tprm-screening-policy v1.0
Scope	30 answers · 3 vendors · 10 controls
Critical controls	C01 Use of customer data for training, C05 Security incident notification, C07 Human oversight and escalation
Overall	**8 PASS · 5 REVIEW · 17 FAIL**

2. Vendor tiers

Quill Support	**High risk · 10 fail / 0 review / 0 pass · critical: C01, C05, C07**
Helix Assist	**High risk · 7 fail / 3 review / 0 pass · critical: C01, C05, C07**
Aurora Desk AI	**Low risk · 0 fail / 2 review / 8 pass**

Model jev-1.13.0 · tprm-screening-policy v1.0 · synthetic vendors · Gustavo Martinelli

3. Findings to confirm (FAIL)

FAIL **Helix Assist · C01 Use of customer data for training**
red flag (p=0.97)

FAIL **Helix Assist · C04 Access control and logging**
red flag (p=0.88)

FAIL **Helix Assist · C05 Security incident notification**
red flag (p=0.83); does not address the control (p=0.14)

FAIL **Helix Assist · C06 AI incident and malfunction reporting**
red flag (p=0.84)

FAIL **Helix Assist · C07 Human oversight and escalation**
red flag (p=0.92)

FAIL **Helix Assist · C08 Model documentation and change notification**
red flag (p=0.97)

FAIL **Helix Assist · C09 Data retention and deletion**
red flag (p=0.74)

FAIL **Quill Support · C01 Use of customer data for training**
does not address the control (p=0.03)

FAIL **Quill Support · C02 Subprocessors and model providers**
does not address the control (p=0.02)

FAIL **Quill Support · C03 Encryption in transit and at rest**
does not address the control (p=0.03)

FAIL **Quill Support · C04 Access control and logging**
does not address the control (p=0.09)

FAIL **Quill Support · C05 Security incident notification**
red flag (p=0.76); does not address the control (p=0.03)

FAIL **Quill Support · C06 AI incident and malfunction reporting**
does not address the control (p=0.04)

FAIL **Quill Support · C07 Human oversight and escalation**
does not address the control (p=0.06)

FAIL **Quill Support · C08 Model documentation and change notification**
red flag (p=0.75); does not address the control (p=0.03)

FAIL **Quill Support · C09 Data retention and deletion**
red flag (p=0.84); does not address the control (p=0.09)

FAIL **Quill Support · C10 Independent assurance**
red flag (p=0.94); does not address the control (p=0.04)

4. Human review queue (REVIEW)

REVIEW **Aurora Desk AI · C04 Access control and logging**
low model confidence (0.55)

REVIEW **Aurora Desk AI · C05 Security incident notification**
low model confidence (0.49)

REVIEW **Helix Assist · C02 Subprocessors and model providers**
unclear whether it addresses the control (p=0.45); possible red flag (p=0.51)

REVIEW **Helix Assist · C03 Encryption in transit and at rest**
possible red flag (p=0.31); low model confidence (0.55)

REVIEW **Helix Assist · C10 Independent assurance**

possible red flag (p=0.67)

5. Passed by screening (PASS) - spot-check by sampling

Aurora Desk AI: C01, C02, C03, C06, C07, C08, C09, C10

6. Method and limitations

- Each answer was judged by a decision model on four typed questions: whether it addresses the control, the type of evidence offered, its specificity, and whether it reveals a red flag.
- Statuses were assigned by an explicit, versioned policy in code, not by the model. The thresholds are documented in the accompanying notebook (tprm-screening-policy v1.0).
- This is a screening, not an assessment. It ranks where human attention should go first; it does not establish compliance. No evidence (reports, certificates, contracts) was reviewed.
- The model may be wrong. Probabilities are estimates, not facts. Every finding must be confirmed by a human before it is communicated to a vendor or used in a decision.
- Vendors and answers are synthetic and were created for educational purposes.
